

Six2 Crew Neonatal Nephrology Internship

Jennifer Chmielewski is a third-year categorical pediatric resident at Indiana University. Her interest in nephrology grew as a medical student through research studying associations of dietary factors with blood pressure and kidney function among adolescents. As a resident, she has blended her interests in neonatology and nephrology through research using AWAKEN data to better understand provider documentation of neonatal AKI. She is applying for neonatology fellowship this year.

Paige Condit is a rising third year pediatrics resident at the University of Wisconsin. She is planning on pursuing neonatology with research interests in neonatal kidney injury and outcomes related to various cardiac physiology. In her free time, she loves to garden and run.

Chris Zimmerman is originally from North Carolina and went to UNC – Chapel Hill for undergraduate and completed his medical school training at Eastern Virginia Medical School and pediatric residency at Duke University Medical Center. He is currently a third year Neonatology fellow at UNC - Chapel Hill where his research interests include clinical pharmacology with a focus on neonatal antihypertensive medications and long-term renal outcomes in extremely low birthweight infants who previously received nephrotoxic medications.

Austin Rutledge is originally from Lexington, KY and completed medical school at the Kentucky College of Osteopathic Medicine. He is currently finishing his 3rd year of pediatric residency at the Medical University of South Carolina where he will be staying for neonatology fellowship as well.

Jacob Little is a second-year pediatric nephrology fellow at Seattle Children's Hospital. His primary career and research interests are in neonatal acute care nephrology.

Elisabeth "Bis" Cole just completed Pediatric Nephrology fellowship at UPMC Children's Hospital of Pittsburgh, where she also completed her residency in Pediatrics. In July she will start a 3 year Neonatal-Perinatal medicine fellowship at St. Louis Children's Hospital/Washington University in St. Louis. She grew up in St. Louis and is very excited to move back home!

Rachel Buckle-Rashid spent her childhood in Michigan but claims Atlanta as home. After graduating from Princeton, she worked as a children's yoga teacher and policy analyst in her two years between college and medical school. She moved back to Atlanta to Emory for medical school and now is a pediatrics PGY-2 at Brown! She will be doing a chief year after PGY-3 and then will apply to pediatric nephrology fellowship. She currently lives in Providence with her husband who is a general surgery resident. She loves tea, reading, and going on long bike rides via the virtual screen on her Peloton.

Jenny Varner has had a usual path to becoming a pediatrician- starting with a BA in Music from Tufts University, to teaching early intervention classes at an Atlanta elementary school, to a Master's degree in Medical Sciences from Boston University, where her thesis research on pediatric kidney stones sparked her interest in pediatric nephrology. She moved back to her hometown in Durham, NC for medical school at Duke University, and is now a PGY2 in Pediatrics at the University of North Carolina. When she is not at the hospital, she enjoys spending time outdoors with her husband Luke, their daughter Lily, and their 2 dogs.
