

The ABCs of Neonatal Kidney Health

Symposium Faculty

Jennifer Jetton, MD
Professor of Pediatrics
Chief, Section of Nephrology
Medical College of Wisconsin
Children's Hospital of Wisconsin
Milwaukee, Wisconsin

Prof Jetton is a pediatric nephrologist with interests in medical education, acute and chronic dialysis program development, and multi-center collaborative clinical research in neonatal acute kidney injury. She is a member of the pADQI workgroup charged with examining the unique roles that education and advocacy play in improving the care of children with AKI.

Katja Gist, MD
Assoc Professor, Pediatric Cardiology & Intensive Care, University of Cincinnati, Dept of Pediatrics, Cincinnati Children's Hospital

Assoc Prof Gist is a pediatric cardiologist and intensivist

Assist Prof Joseph is a nephrologist

Catherine Joseph, MD
Assistant Professor, Renal Section
Baylor College of Medicine, Texas

Cara Slagle, MD
Assistant Professor, University of Cincinnati, Division of Neonatology and Pulmonary Biology, Cincinnati Children's Hospital

Assist Prof Slagle is a neonatologist

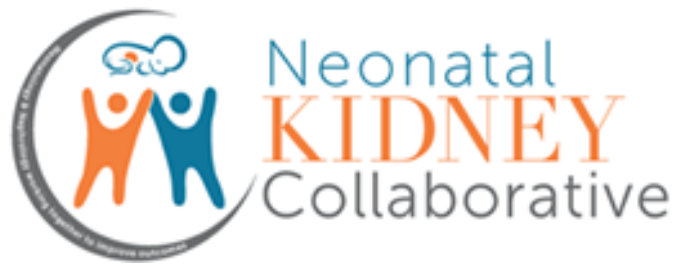

Prof Flynn is a nephrologist

Joseph Flynn, MD
Division Chief, Professor Pediatrics,
Dr Robert O Hickman Endowed
Chair, Pediatric Nephrology, Seattle
Children's Hospital

Alison Kent, BMBS, FRACP, MD
Professor, Neonatology, Women's and Children's Hospital, Adelaide, Australia
Adjunct Professor of Pediatrics
University of Rochester, New York

Prof Kent is a neonatologist with interests in kidney development and acute kidney injury. She has developed an animal model of HIE and AKI. She is a member of the Neonatal Acute Kidney Injury Australia and New Zealand Study examining the incidence of AKI in neonates. She is also involved with perinatal morbidity and mortality research.

The ABCs of Neonatal Kidney Health

Symposium Learning Objectives

Fluid Imbalance and Overload

1. Objective

Neonatal Hypertension

1. Objective

Biomarkers of Neonatal AKI

1. Objective

Neonatal Dialysis—Clinical Scenarios

1. Objective
