

Tara Beck is a PGY-6 pursuing dual fellowship training in Neonatology and Nephrology at the University of Pittsburgh Medical Center. She was born and raised in South Jersey and attended the University of Delaware's Honors Program where she majored in Neuroscience. She returned home to South Jersey to attend Rowan University School of Osteopathic Medicine, then made her way back to the First State as a Pediatric Resident at Nemours Children's Health.

Throughout residency, she developed a passion for Neonatology with a research focus in fluid management of extremely low gestational age newborns. Tara ventured to the other side of Pennsylvania to pursue Neonatology and Nephrology training with hopes of developing a niche in critical care Nephrology.

Dayle Bondarev is from Manila, Philippines. She moved to Northern California when she was 17. After getting her Bachelor of Science in biomedical sciences from UC Santa Cruz, she worked as a translational research associate at UCSF while getting her medical school application ready. She went to Chicago Medical School at Rosalind Franklin University and is currently bound to graduate her neonatology fellowship in June 2024 at Rainbow Babies. Her current research interests are acute kidney injury and its association to neurodevelopmental outcomes. Her husband is an incoming musculoskeletal radiology fellow at Cleveland Clinic. They have 2 cats, a pandemic puppy, and are expecting their first-born son in September. Her hobbies are cooking and traveling.

They have 2 cats, a pandemic puppy, and are expecting their first-born son in September. Her hobbies are cooking and traveling.

Miranda Deutmeyer is currently a second, almost third, year pediatric resident at the University of Iowa. She will be pursuing a NICU fellowship this upcoming application cycle. In her free time, she loves to spend time with her husband, family, and dog, as well as gardening and kayaking.

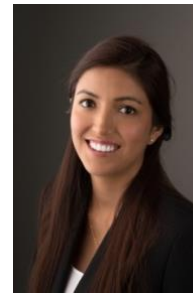

Matt Gillen is originally from Virginia and completed pediatric residency training at Cincinnati Children's Hospital Medical Center. He is currently a second-year Neonatology fellow at Emory University where he will also complete Pediatric Nephrology fellowship. His clinical and research interests include kidney support therapy and acute kidney injury in high-risk neonatal populations.

Jaya Isaac is currently a second-year pediatric nephrology fellow at Montefiore Medical Center. She attended medical school at SUNY Downstate Medical Center and completed residency and chief residency at Rutgers Robert Wood Johnson University Hospital. Her current research focuses on the outcomes of glomerular disease in those born preterm.

Caroline Jackson was born and raised in Marietta, Georgia, but has called Seattle home for more than a decade. She went to medical school at the University of Washington and stayed at Seattle Children's for pediatrics residency and nephrology fellowship, where she is about to enter her third year. She and her husband Paul have a fun-loving and precocious 2-year-old named Boaz who recently stepped into the role of big brother to their sweet baby Simon, now 3 months old. They spend most of their free time at the Woodland Park Zoo, Pacific Science Center, and searching for snails in the backyard.

Evelyn Obregon is a neonatology fellow at Cincinnati Children's Hospital. She earned her medical degree in Lima, Peru, and completed her pediatric residency at the University of Florida Shands Children's Hospital. In addition to her clinical training, she pursued a research fellowship in Newborn Medicine at Beth Israel Deaconess Medical Center/Harvard Medical School in Boston. During this time, she conducted and published research with a focus on improving care for underserved populations. Currently, her research interests continue to focus on health equity and advocacy, with a growing interest in improving outcomes for preterm infants with acute kidney injury.

Samantha Schwartz began pediatric nephrology fellowship at Ann & Robert H. Lurie Children's Hospital of Chicago in July 2022 and will soon be transitioning to a more research-focused curriculum at the beginning of her second year of fellowship. During residency, she discovered her true calling within pediatrics (nephrology!) as she enjoyed the complexity of patient care, the longitudinal relationships with patients from diagnosis to dialysis to transplant, and the opportunity to participate in procedures. She recently moved back to the Chicagoland area for fellowship, after living in Michigan for

more than ten years from college through residency.

Kimmy Vuong is a first-generation Vietnamese American born and raised in North Carolina (Tarheel girl!). She completed pediatric residency and a chief year at the University of California San Diego before coming for pediatric nephrology fellowship at Baylor College of Medicine and Texas Children's Hospital. She has always had a love for neonatal nephrology due to her love for tiny babies and tiny kidneys, and she is excited to connect more closely with the NKC and Six2 Crew!
